CALL NUMBER: WA MSS S-2963

CREATOR: Galloway , Gerald Fogarty, 1886-1975

TITLE: Gerald Fogarty Galloway Collection of Records Concerning Mines and Real Property in Park County, Colorado

DATES: circa 1872-circa 1970

PHYSICAL DESCRIPTION: 32.44 linear feet (55 boxes) + 106 broadsides, 28 rolls

LANGUAGE: In English.

SUMMARY: Material collected and created by Gerald F. Galloway including maps, field notes, correspondence, and other papers related to mining and the development of real property in Park County, Colorado, circa 1872-circa 1970. The bulk of material in the collection relates to gold, silver, lead, zinc, and uranium mines, as well as the companies responsible for mining operations. The collection also documents the infrastructure of Park County, including roads and water works in the county seat, Fairplay, and the statutory town of Alma, as well as the communities of Bailey, Como, Grant, Guffey, Hartsel, Jefferson, Lake George, and Shawnee. It also details changes in areas that became ghost towns, including Antero Junction, Buckskin Joe (also known as Laurette or Lauret), Garo, Howbert, and Tarryall. The collection documents the surveying work of Galloway, as well as his predecessors in the regions, including Fred C. Morse, Lee Hayes, Hiram Phillips, and William H. Powless.

Processing Notes

Collections are processed to a variety of levels, depending on the work necessary to make them usable, their perceived research value, the availability of staff, competing priorities, and whether or not further accruals are expected. The library attempts to provide a basic level of preservation and access for all collections, and does more extensive processing of higher priority collections as time and resources permit.

Upon initial accessioning of the collection in 1997, library staff placed the majority of oversize material into broadside folders and made no effort to arrange it. In 2014, library staff created lists of the oversize material as housed during accessioning, and minimally arranged other material.

Gerald Fogarty Galloway (1886-1975)

Gerald "Jerry" Fogarty Galloway was born in Epping, England, son of a medical doctor Arthur Wilton Galloway (1849-1908) and Louisa Warde Fogarty Galloway (1851-1924). He immigrated to the United States in 1901, graduated from Colorado University in 1914, and subsequently taught at Rice University. In 1918, Galloway moved to Alma, Colorado, where he worked as an independent civil mining engineer, as well as a county surveyor and county supervisor for Park County. He also became active in several local mining ventures.

In his work, Galloway collected and maintained real property records for Park County created before he began his tenure as county surveyor. This includes the earliest records created by Lee Hayes (1844-1946), a mining engineer and United States deputy mineral surveyor established in the region circa 1880. In 1884, Hayes sold his business to engineers Hiram Phillips (1859-1921) and William H. Powless (1853-1949); the latter consequently served as county surveyor. During his tenure, Powless surveyed many of the region's roads and town plats represented in the collection, as well as established water rights in Park County. In 1919, Powless sold his business to Galloway, who likely acquired Hayes's and Powless's files at that time.

In 1917, Galloway married Mary "Molly" Montague (1896-1990), and they had a son, Gerald Fogarty Galloway, Jr. (born circa 1924).

Description of the Papers

Material collected and created by Gerald F. Galloway including maps, field notes, correspondence, and other papers related to mining and the development of real property in Park County, Colorado, circa 1872-circa 1970. The bulk of material in the collection relates to gold, silver, lead, zinc, and uranium mines, as well as the companies responsible for mining operations. The collection also documents the infrastructure of Park County, including roads and water works in the county seat, Fairplay, and the statutory town of Alma, as well as the communities of Bailey, Como, Grant, Guffey, Hartsel, Jefferson, Lake George, and Shawnee. It also details changes in areas that became ghost towns, including Antero Junction, Buckskin Joe (also known as Laurette or Lauret), Garo, Howbert, and Tarryall. The collection documents the surveying work of Galloway, as well as his predecessors in the regions, including Fred C. Morse, Lee Hayes, Hiram Phillips, and William H. Powless.

Personal papers related to Galloway in the collection include his schoolwork from the Colorado University and a correspondence course at Columbia University in the City of New York, as well as correspondence with friends and extended family members.

Series VI: Broadside Material, 1889-1969*106 broadsides*

Series VI consists of oversize material that chiefly relate to mines and lodes in Park County, Colorado, including affidavits, field notes, surveys, maps, plats, correspondence, and other material.

Upon accessioning in 1997, library staff placed the material in broadside folders. In most cases, an individual broadside folder contains many items.

In 2014, library staff created a list of the material within in each broadside folder. Not all material has definitive identification.

Map No. 151 in Series VI contains information regarding Tabeguache Creek in Chaffee County, Colorado. The file title and map use the oppressive and harmful term "squaw," as a previous name for Tabeguache Creek was Squaw Creek. The use of this description is not an endorsement of the language it contains. This language has been retained to promote searchability and discoverability of the collections.

Series VI is arranged as received by the library with unsorted material followed by a group of Park County Water Works Maps.

Series VII: Rolled Material, 1882-1963*3.3 linear feet (13 boxes) + 28 rolls*

Series VII consists of material accessioned and chiefly retained as rolls that relate to mines and lodes in Park County, Colorado, including affidavits, field notes, surveys, maps, plats, correspondence, and other material.

Upon accessioning in 1997, library staff retained material in rolls. In 2014, library staff created a list of the material within each subseries.

In many cases, a single roll contains several items.

Series VII is organized into two subseries: Small Rolls, and Large Rolls.

Short Rolls

Short rolls of material housed in oversize boxes.

Arranged as accessioned by library staff.
