CALL NUMBER: MS 1307

CREATOR: Fizeau, H. (Hippolyte), 1819-1896

TITLE: Armand Hippolyte Louis Fizeau papers

DATES: 1870-1879

PHYSICAL DESCRIPTION: 0.5 linear feet

LANGUAGE: English

SUMMARY: The papers consist of correspondence and printed matter of Armand Hippolyte Louis Fizeau relating to the solar system and astronomical research materials.

ONLINE FINDING AID: To cite or bookmark this finding aid, please use the following link: <https://hdl.handle.net/10079/fa/mssa.ms.1307>

Requesting Instructions

To request items from this collection for use in the Manuscripts and Archives reading room, please use the request links in the HTML version of this finding aid, available at <https://hdl.handle.net/10079/fa/mssa.ms.1307>.

To order reproductions from this collection, please go to http://www.library.yale.edu/mssa/ifr_copy_order.html. The information you will need to submit an order includes: the collection call number, collection title, series or accession number, box number, and folder number or name.

Administrative Information

Immediate Source of Acquisition

Transferred from the Yale University Medical Historical Library, 1980.

Conditions Governing Access

The materials are open for research.

Conditions Governing Use

Unpublished materials authored or otherwise produced by the creator(s) of this collection are in the public domain. There are no restrictions on use. Copyright status for other collection materials is unknown. Transmission or reproduction of materials protected by U.S. Copyright Law (Title 17, U.S.C.) beyond that allowed by fair use requires the written permission of the copyright owners. Works not in the public domain cannot be commercially exploited without permission of the copyright owners. Responsibility for any use rests exclusively with the user.

Preferred Citation

Armand Hippolyte Louis Fizeau Papers (MS 1307). Manuscripts and Archives, Yale University Library.

Biographical / Historical

Armand Hippolyte Louis Fizeau was born on November 23, 1819, in Paris, France. He received his secondary school education at the Collège Stanislas with the intention of becoming a doctor. Illness forced Fizeau to discontinue classes and upon returning, he studied physics. Fizeau's early work included the improvement of the daguerreotype process. This allowed Fizeau and Léon Foucault to be the first to photograph the disk of the sun. Probably Fizeau's most significant contribution was the calculation of the speed of light using only terrestrial methods. He also calculated the velocity of electricity in wires. Fizeau died on September 18, 1896, in Venteuil, France.

Scope and Contents

The papers consist of correspondence and printed matter of Armand Hippolyte Louis Fizeau relating to the solar system and astronomical research materials.

Collection Contents

b.1	Correspondence and printed material relating to the study of the solar system	1870s
