Scope and Contents

A small amount of correspondence of Hubert Newton, two letters to his daughter about his death, two notebooks and some loose notes, and a variety of certificates and diplomas make up the Hubert Anson Newton Papers. All of the materials relate to Newton's career as a mathematician and professor at Yale University. Perhaps the most interesting item in the collection is a letter from Noah Porter to Newton describing Thorstein B. Veblen and pleading for his admission as a Ph.D. candidate despite his "limited means" (folder 2). Also of interest is a notebook compiled connection with Newton's "Length of Life of the Yale Graduates in the Years [1701]-1762," published in the first and second series of F. B. Dexter's *Biographical Sketches of the Graduates of Yale College*.

These papers were donated to Yale University by Mrs. John A. Porter and May A. Atchison in 1949 and by Katharine H. Edwards in 1970.
