Processing Information

Collections are processed to a variety of levels, depending on the work necessary to make them usable, their perceived research value, the availability of staff, competing priorities, and whether or not further accruals are expected. The library attempts to provide a basic level of preservation and access for all collections, and does more extensive processing of higher priority collections as time and resources permit. This collection received a basic level of processing, including rehousing, in 2014 and 2015.

The collection is comprised of material formerly classed as MS Vault 10:4 and MS Vault Shelves Oxford, Ip P725+C2, Lmd54 865+3, Ucu35 G6 +867i, Ovf86 O9+A9, Ovf86 O9+753P, Byzo 87+897n.

The finding aid for this collection is partially compiled from individual catalog cards that were created at or around the time of receipt by the library. Information from the catalog cards was repurposed in the finding aid in accordance with current archival descriptive standards. Some catalog cards, copies of which are filed with the collection, include more detailed descriptions of individual items and/or provenance notes. Descriptions for items not represented by catalog cards were derived from accession records, folder labels, or other available descriptive material.
